CONTROL THEORY AND APPLICATIONS

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom
Publishing Department: Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom

Volume 145 1998 UK ISSN 1350–2395

HONORARY EDITORS

Prof. B. V. Jayawant (*University of Sussex*)
Prof. K. Warwick (*University of Reading*)
Prof. H. Unbehauen (*Ruhr-Universität Bochum*)

Pages in issues of *IEE Proc., Control Theory Appl.* 1998

Pages	Issue No.	Date
1–112	1	February
113–240	2	April
241–376	3	June
377–441	4	August
385–484	5	October
485–608	6	December

ADAPTIVE CONTROL

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Application of adaptive dual controllers to a DC-motor p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575
Composite adaptive position controller for induction motor using feedback linearisation p25
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Generalised predictive controller with pole restriction p219
Heterogeneous intelligent control systems p551
Indirect adaptive control for a class of linear time-varying plants p141
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks p568
Online process estimation by ANNs and Smith controller design p231
Recurrent networks for nonlinear adaptive control p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances p323
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems p41
Rule regulation of indirect adaptive fuzzy controller design p513
Slider-crank mechanism control using adaptive computed torque technique p364
SMC-based adaptive input-output linearising control of induction motors p55

AEROSPACE SYSTEMS

Minimal state-space model realisation of a nonlinear helicopter p415(4)
Nonlinear robust controller for a class of nonlinear uncertain systems p405(5)

AUDIO EQUIPMENT

Fuzzy neural systems for controlling sound localisation in stereophonic reproduction p393(4)

CLOSED LOOP SYSTEMS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Closed-loop control system robustness improvement by a parameterised state feedback p33
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of stable actuator saturation compensators in the frequency domain p345
Generalised predictive controller with pole restriction p219
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
Indirect adaptive control for a class of linear time-varying plants p141
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Neural servocontroller for nonlinear MIMO plant p277
PID tuning based on loop-shaping H_∞ control p485
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
Robust digital controller design for processes with dead times: new results p159
Robust regional stabilisation of an electropneumatic actuator p226
Robust stabilisation of a state delayed system p87

COMPUTATIONAL COMPLEXITY

Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575

COMPUTER APPLICATIONS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Application of adaptive dual controllers to a DC-motor p299
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197
Efficient processor arrays for the implementation of the generalised predictive-control algorithm p47
Intelligent control for handling motion nonlinearity in a retrofitted machining table p403(4)
Slider-crank mechanism control using adaptive computed torque technique p364

CONTROL SYSTEMS ANALYSIS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Application of adaptive dual controllers to a DC-motor p299
Bounded real lemma and H_∞ control for descriptor systems p316
Closed-loop control system robustness improvement by a parameterised state feedback p33
Control of single-link flexible beam using Hankel-norm-based reduced-order model p151
Cyclic control of linear systems with application to a flexible arm p19
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Design of an iterative learning controller for a class of linear dynamic systems with time delay p507
Design of optimal reduced order filter for unstable discrete time systems p397(5)
Design of stable actuator saturation compensators in the frequency domain p345
Digital redesign and performance evaluation using the energy resemblance index (ERI) p383(4)
Discrete-time model reduction with optimal zero locations by norm minimisation p499
Distributed state observer scheme for large-scale interconnected systems p331
Generalised predictive controller with pole restriction p219
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances p435(4)
Indirect adaptive control for a class of linear time-varying plants p141
Input and output scaling and reordering for diagonal dominance and block diagonal dominance p523
Integrated approach to eigenstructure assignment by output feedback: the case of multiple eigenvalues p265
Introduction to a special coordinate basis for multivariable linear systems p204
LFT approach to robust $\mathcal{D}$-stability bounds of uncertain linear singular systems p127
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems p491
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Modified feasible method for hierarchical steady-state control of complex systems p603
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems p241
Nonlinear robust controller for a class of nonlinear uncertain systems p405(5)
Online process estimation by ANNs and Smith controller design p231
Optimal controller design for nonlinear systems p97
PID tuning based on loop-shaping H_∞ control p485
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances p323
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
Robust control of sampled data systems p236
Robust digital controller design for processes with dead times: new results p159
Robust discrete time observer with application to fault diagnosis p353
Robust gamma stability of highly perturbed systems p165
Robust regional stabilisation of an electropneumatic actuator p226
Robust stabilisation of a state delayed system p87
Rule regulation of indirect adaptive fuzzy controller design p513
Scan loop control design for a spin-stabilised seeker p119
Stable dynamical controller design for robust polynomial pole assignment p259
State-space solution of the standard H_∞ control problem for strip mill gauge control p291

CONTROL SYSTEM SYNTHESIS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Closed-loop control system robustness improvement by a parameterised state feedback p33
Control of single-link flexible beam using Hankel-norm-based reduced-order model p151
Cyclic control of linear systems with application to a flexible arm p19
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Design of an iterative learning controller for a class of linear dynamic systems with time delay p507
Design of stable actuator saturation compensators in the frequency domain p345
Digital redesign and performance evaluation using the energy resemblance index (ERI) p383(4)
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
Input and output scaling and reordering for diagonal dominance and block diagonal dominance p523
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems p491
Nonlinear robust controller for a class of nonlinear uncertain systems p405(5)
Online process estimation by ANNs and Smith controller design p231
Optimal controller design for nonlinear systems p97
PID tuning based on loop-shaping H_∞ control p485
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
Robust control of sampled data systems p236
Robust digital controller design for processes with dead times: new results p159
Robust stabilisation of a state delayed system p87
Rule regulation of indirect adaptive fuzzy controller design p513
Scan loop control design for a spin-stabilised seeker p119
Stable dynamical controller design for robust polynomial pole assignment p259
State-space solution of the standard H_∞ control problem for strip mill gauge control p291

CYBERNETICS AND ROBOTICS

Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Application of self-organising neural networks in robot tracking control p135
Control of single-link flexible beam using Hankel-norm-based reduced-order model p151
Cyclic control of linear systems with application to a flexible arm p19
Double-controller scheme for control of processes with dominant delay p479(5)
Heterogeneous intelligent control systems p551
Intelligent control for handling motion nonlinearity in a retrofitted machining table p403(4)
Introduction to a special coordinate basis for multivariable linear systems p204
Modelling and control of an under-actuated closed kinematic chain p1
Optimal controller design for nonlinear systems p97
Robust discrete time observer with application to fault diagnosis p353
Robust Lyapunov control with perturbation estimation p307
Robust position/force control of robot manipulators during constrained tasks p427(4)
Status monitoring in flexible manipulators p537

DIELECTRIC MATERIALS AND DEVICES

Dynamic modelling of dielectric response in the presence of a varying external parameter p9

DISCRETE SYSTEMS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Design of optimal reduced order filter for unstable discrete time systems p397(5)
Digital redesign and performance evaluation using the energy resemblance index (ERI) p383(4)
Discrete-time model reduction with optimal zero locations by norm minimisation p499
Efficient numerical method for the discrete-time symmetric matrix polynomial equation p443(5)
Generalised predictive controller with pole restriction p219
LFT approach to robust $\mathcal{D}$-stability bounds of uncertain linear singular systems p127
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Method of constructing Lyapunov functions for linear discrete time systems p83
Robust control of sampled data systems p236
Robust digital controller design for processes with dead times: new results p159
Robust discrete time observer with application to fault diagnosis p353
Robust gamma stability of highly perturbed systems p165

DISTRIBUTED PARAMETER SYSTEMS

Control of single-link flexible beam using Hankel-norm-based reduced-order model p151
Cyclic control of linear systems with application to a flexible arm p19
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of an iterative learning controller for a class of linear dynamic systems with time delay p507
Double-controller scheme for control of processes with dominant delay p479(5)
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems p491
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Online process estimation by ANNs and Smith controller design p231
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust stabilisation of a state delayed system p87

ELECTRIC VARIABLES CONTROL

Observer-based speed estimation method for sensorless vector control of induction motors p359

FEEDBACK

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Application of self-organising neural networks in robot tracking control p135
Composite adaptive position controller for induction motor using feedback linearisation p25
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
Integrated approach to eigenstructure assignment by output feedback: the case of multiple eigenvalues p265
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Modelling and control of an under-actuated closed kinematic chain p1
Modified feasible method for hierarchical steady-state control of complex systems p603
Neural servocontroller for nonlinear MIMO plant p277
Observer-based speed estimation method for sensorless vector control of induction motors p359
Optimal controller design for nonlinear systems p97
Recurrent networks for nonlinear adaptive control p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances p323
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
State-space solution of the standard H_∞ control problem for strip mill gauge control p291

FORMAL LOGIC

Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)

FUZZY CONTROL

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Autogeneration of fuzzy rules and membership functions for fuzzy modelling using rough set theory p437(5)
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction p393(4)
Genetic algorithm based methodology to generate automatically optimal fuzzy systems p583
Intelligent control for handling motion nonlinearity in a retrofitted machining table p403(4)
Rule regulation of indirect adaptive fuzzy controller design p513

GENERATORS

Application of adaptive dual controllers to a DC-motor p299
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model p269

INDUCTION MOTORS

Composite adaptive position controller for induction motor using feedback linearisation p25
Observer-based speed estimation method for sensorless vector control of induction motors p359
Parameter identification of induction motor model using genetic algorithms p587
SMC-based adaptive input-output linearising control of induction motors p55

INFORMATION THEORY

Better M sequence design for parameter identification based on EKF p92
Cluster analysis of NARMAX models for signal-dependent systems p409(4)
Design of stable actuator saturation compensators in the frequency domain p345
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Neural servocontroller for nonlinear MIMO plant p277
Observer-based speed estimation method for sensorless vector control of induction motors p359
Properties of risk-sensitive filters/estimators p106
Simulation approach and causality evaluation for an active noise control system p423(4)

MAGNETIC MATERIALS AND DEVICES

Acceleration feedforward control for active magnetic bearing systems excited by ground motion p113
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model p269

MATHEMATICAL TECHNIQUES

Application of adaptive dual controllers to a DC-motor p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575
Autogeneration of fuzzy rules and membership functions for fuzzy modelling using rough set theory p437(5)
Bounded real lemma and H_∞ control for descriptor systems p316
Cluster analysis of NARMAX models for signal-dependent systems p409(4)
Control of single-link flexible beam using Hankel-norm-based reduced-order model p151
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of optimal reduced order filter for unstable discrete time systems p397(5)
Discrete-time model reduction with optimal zero locations by norm minimisation p499
Distributed state observer scheme for large-scale interconnected systems p331
Dynamic modelling of dielectric response in the presence of a varying external parameter p9
Generalised predictive controller with pole restriction p219
Genetic algorithm based methodology to generate automatically optimal fuzzy systems p583
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances p435(4)
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems p491
Method of constructing Lyapunov functions for linear discrete time systems p83
Mini-max control of cross-directional variations on a paper machine p189
Modified feasible method for hierarchical steady-state control of complex systems p603
Optimal controller design for nonlinear systems p97
Parameter identification of induction motor model using genetic algorithms p587
Properties of risk-sensitive filters/estimators p106
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
Robust control of sampled data systems p236
Scan loop control design for a spin-stabilised seeker p119
Status monitoring in flexible manipulators p537
Towards the formalisation of soft systems models using Petri net theory p463(5)
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters p73

MILITARY SYSTEMS

Scan loop control design for a spin-stabilised seeker p119

MULTIVARIABLE CONTROL SYSTEMS

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Closed-loop control system robustness improvement by a parameterised state feedback p33
Constrained multivariable cautious stable predictive control p385(5)
Cyclic control of linear systems with application to a flexible arm p19
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Distributed state observer scheme for large-scale interconnected systems p331
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances p435(4)
Input and output scaling and reordering for diagonal dominance and block diagonal dominance p523
Integrated approach to eigenstructure assignment by output feedback: the case of multiple eigenvalues p265
Introduction to a special coordinate basis for multivariable linear systems p204
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Mini-max control of cross-directional variations on a paper machine p189
Modified feasible method for hierarchical steady-state control of complex systems p603
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems p241
Neural servocontroller for nonlinear MIMO plant p277
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks p568
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust Lyapunov control with perturbation estimation p307

SMC-based adaptive input-output linearising control of induction motors p55

NEURAL NETS

Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Application of self-organising neural networks in robot tracking control p135
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction p393(4)
Intelligent control for handling motion nonlinearity in a retrofitted machining table p403(4)
Neural network α-th order inverse system method for the control of nonlinear continuous systems p519
Neural servocontroller for nonlinear MIMO plant p277
Online process estimation by ANNs and Smith controller design p231
Recurrent networks for nonlinear adaptive control p177
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems p41
SMC-based adaptive input-output linearising control of induction motors p55

NONELECTRIC VARIABLES CONTROL

Acceleration feedforward control for active magnetic bearing systems excited by ground motion p113
Application of adaptive dual controllers to a DC-motor p299
Composite adaptive position controller for induction motor using feedback linearisation p25
Control of single-link flexible beam using Hankel-norm-based reduced-order model p151
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction p393(4)
Longitudinal control with time delay in platooning p211
Observer-based speed estimation method for sensorless vector control of induction motors p359
Robust position/force control of robot manipulators during constrained tasks p427(4)
Simulation approach and causality evaluation for an active noise control system p423(4)
Slider-crank mechanism control using adaptive computed torque technique p364
State-space solution of the standard H_∞ control problem for strip mill gauge control p291

NONLINEAR CONTROL SYSTEMS

Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems p241
Neural network α-th order inverse system method for the control of nonlinear continuous systems p519
Neural servocontroller for nonlinear MIMO plant p277
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model p269
Nonlinear robust controller for a class of nonlinear uncertain systems p405(5)
Optimal controller design for nonlinear systems p97
Recurrent networks for nonlinear adaptive control p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances p323
Robust Lyapunov control with perturbation estimation p307
SMC-based adaptive input-output linearising control of induction motors p55

NUMERICAL ANALYSIS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575
Application of self-organising neural networks in robot tracking control p135
Efficient numerical method for the discrete-time symmetric matrix polynomial equation p443(5)

OPTIMAL CONTROL

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Application of adaptive dual controllers to a DC-motor p299
Bounded real lemma and H_∞ control for descriptor systems p316
Constrained multivariable cautious stable predictive control p385(5)
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Efficient processor arrays for the implementation of the generalised predictive-control algorithm p47
Generalised predictive controller with pole restriction p219
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances p435(4)
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems p491
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems p241
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks p568
Online process estimation by ANNs and Smith controller design p231
Optimal controller design for nonlinear systems p97
PID tuning based on loop-shaping H_∞ control p485
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
Rule regulation of indirect adaptive fuzzy controller design p513
Scan loop control design for a spin-stabilised seeker p119
Stable dynamical controller design for robust polynomial pole assignment p259
State-space solution of the standard H_∞ control problem for strip mill gauge control p291

OPTIMISATION

Application of adaptive dual controllers to a DC-motor p299
Design of optimal reduced order filter for unstable discrete time systems p397(5)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances p435(4)
Modified feasible method for hierarchical steady-state control of complex systems p603

PARALLEL PROCESSING

Efficient processor arrays for the implementation of the generalised predictive-control algorithm p47

PARAMETER ESTIMATION

Application of adaptive dual controllers to a DC-motor p299
Better M sequence design for parameter identification based on EKF p92
Online process estimation by ANNs and Smith controller design p231
Parameter identification of induction motor model using genetic algorithms p587
Properties of risk-sensitive filters/estimators p106
Status monitoring in flexible manipulators p537

PATTERN RECOGNITION

Cluster analysis of NARMAX models for signal-dependent systems p409(4)

POWER SYSTEM CONTROL

Acceleration feedforward control for active magnetic bearing systems excited by ground motion p113
Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Application of adaptive dual controllers to a DC-motor p299
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)
Composite adaptive position controller for induction motor using feedback linearisation p25
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model p269
Observer-based speed estimation method for sensorless vector control of induction motors p359
Parameter identification of induction motor model using genetic algorithms p587
Slider-crank mechanism control using adaptive computed torque technique p364
SMC-based adaptive input-output linearising control of induction motors p55

POWER SYSTEMS AND APPLICATIONS

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197

POWER SYSTEMS AND PLANTS

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives p197

PREDICTIVE CONTROL

Constrained multivariable cautious stable predictive control p385(5)
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Efficient processor arrays for the implementation of the generalised predictive-control algorithm p47
Generalised predictive controller with pole restriction p219
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems p241
Online process estimation by ANNs and Smith controller design p231

PROBABILITY AND STATISTICS

Properties of risk-sensitive filters/estimators p106

PRODUCTION ENGINEERING

Double-controller scheme for control of processes with dominant delay p479(5)
Intelligent control for handling motion nonlinearity in a retrofitted machining table p403(4)
Mini-max control of cross-directional variations on a paper machine p189

Robust stabilisation of a state delayed system p87
State-space solution of the standard H_∞ control problem for strip mill gauge control p291
Status monitoring in flexible manipulators p537

PROGRAMMING THEORY

Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575

SELF-ADJUSTING SYSTEMS

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Application of adaptive dual controllers to a DC-motor p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system p419(5)
Composite adaptive position controller for induction motor using feedback linearisation p25
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Design of an iterative learning controller for a class of linear dynamic systems with time delay p507
Generalised predictive controller with pole restriction p219
Heterogeneous intelligent control systems p551
Indirect adaptive control for a class of linear time-varying plants p141
Intelligent control for handling motion nonlinearity in a retrofitted machining table p403(4)
Learning approach to control of servomotors under disturbance torque dependent on time and states p251
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks p568
Online process estimation by ANNs and Smith controller design p231
Recurrent networks for nonlinear adaptive control p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances p323
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems p41
Rule regulation of indirect adaptive fuzzy controller design p513
Slider-crank mechanism control using adaptive computed torque technique p364
SMC-based adaptive input-output linearising control of induction motors p55

SIGNAL PROCESSING

Efficient numerical method for the discrete-time symmetric matrix polynomial equation p443(5)
Properties of risk-sensitive filters/estimators p106

SIMULATION, MODELLING AND IDENTIFICATION

Application of adaptive dual controllers to a DC-motor p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems p575
Application of self-organising neural networks in robot tracking control p135
Autogeneration of fuzzy rules and membership functions for fuzzy modelling using rough set theory p437(5)
Better M sequence design for parameter identification based on EKF p92
Cluster analysis of NARMAX models for signal-dependent systems p409(4)
Design of a hydraulic force control system using a generalised predictive control algorithm p428(5)
Design of optimal reduced order filter for unstable discrete time systems p397(5)
Discrete-time model reduction with optimal zero locations by norm minimisation p499
Distributed state observer scheme for large-scale interconnected systems p331
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Observer-based speed estimation method for sensorless vector control of induction motors p359
Online process estimation by ANNs and Smith controller design p231
Parameter identification of induction motor model using genetic algorithms p587
Properties of risk-sensitive filters/estimators p106
Robust discrete time observer with application to fault diagnosis p353
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems p41
SMC-based adaptive input-output linearising control of induction motors p55
Status monitoring in flexible manipulators p537
Towards the formalisation of soft systems models using Petri net theory p463(5)
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters p73

SONICS AND ULTRASONICS

Simulation approach and causality evaluation for an active noise control system p423(4)

STABILITY

Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds p472(5)
Closed-loop control system robustness improvement by a parameterised state feedback p33
Composite adaptive position controller for induction motor using feedback linearisation p25
Constrained multivariable cautious stable predictive control p385(5)
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays p338
Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Design of stable actuator saturation compensators in the frequency domain p345
Generalised predictive controller with pole restriction p219
Global exponential stabilisation for nonlinear singularly perturbed systems p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances p435(4)
Learning approach to control of servomotors under disturbance torque dependent on time and states p251
LFT approach to robust $\mathcal{D}$-stability bounds of uncertain linear singular systems p127
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems p491
Longitudinal control with time delay in platooning p211
Method of constructing Lyapunov functions for linear discrete time systems p83
Mini-max control of cross-directional variations on a paper machine p189
Minimal state-space model realisation of a nonlinear helicopter p415(4)
Modelling and control of an under-actuated closed kinematic chain p1
Nonlinear robust controller for a class of nonlinear uncertain systems p405(5)
PID tuning based on loop-shaping H_∞ control p485
PID tuning for unstable processes based on gain and phase-margin specifications p392(5)
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances p323
Robust and H_∞ stabilisation of interconnected systems with delays p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies p531
Robust control of sampled data systems p236
Robust digital controller design for processes with dead times: new results p159
Robust gamma stability of highly perturbed systems p165
Robust Lyapunov control with perturbation estimation p307
Robust position/force control of robot manipulators during constrained tasks p427(4)
Robust regional stabilisation of an electropneumatic actuator p226
Robust stabilisation of a state delayed system p87
Rule regulation of indirect adaptive fuzzy controller design p513
Slider-crank mechanism control using adaptive computed torque technique p364
Stable dynamical controller design for robust polynomial pole assignment p259
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters p73

SYNCHRONOUS MACHINES

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives p63
Slider-crank mechanism control using adaptive computed torque technique p364

SYSTEMS THEORY

Adaptive H_∞ neural network tracking controller for electrically driven manipulators p594
Genetic algorithm based methodology to generate automatically optimal fuzzy systems p583
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems p41
Towards the formalisation of soft systems models using Petri net theory p463(5)
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters p73

TIME-VARYING SYSTEMS

Design of a sliding mode controller with fuzzy sliding surfaces p411(5)
Indirect adaptive control for a class of linear time-varying plants p141
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels p449(5)
